Laura Wayman's mission as "The Dementia Whisperer" and as an internationally recognized dementia care expert and author is to change the world in how all memory care services are provided to those who suffer from various memory care impairments. Laura wants to give meaning and purpose to those diagnosed with dementia or memory impairment—as well as give caregivers and families peace of mind and help them understand that there is enhanced quality of life for, as well as improved quality of relationships with those who experience dementia symptoms

By the end of Laura's presentation, the participants will have an understanding of not only the importance of caring for themselves; they will also have valuable techniques to assist them in managing stressors in their lives and how to better communicate with those struggling with dementia symptoms. This presentation is designed to empower participants in a way that is refreshing, relieving and rewarding – moving from guilt to gratitude to fulfillment.

By practicing and putting to use all of Laura's examples of affirming responses, care providers will better understand the dementia world, and guide their feelings to more of a cooperative and positive outcome. Learning to do so in a relaxed, confident, and calm manner will assist the emotional understanding necessary to solve behavioral challenges that can come up on a daily basis when dealing with the different causes of dementia symptoms.
